

CAPACITIVE TOUCHPAD INTEGRATED WITH KEY AND HANDWRITING FUNCTIONS

5

ABSTRACT OF THE DISCLOSURE

10 A capacitive touchpad integrated with key and
handwriting functions is provided for operation in key,
handwriting and mouse modes. Several regions are defined
on the panel of the touchpad and have several patterns
printed thereon for the operation modes thereby. In the key
mode, the key patterns among the printed patterns simulate a
15 keyboard. In the handwriting mode, the handwriting region
among the defined regions serves to handwriting input. In
the mouse mode, the defined regions provide a cursor moving
region and a horizontal and vertical scroll bars for input
operations.
